## SHIMI DIE-CASTING MACHINE

Create more efficient, energy-saving, stable and durable die-casting machines  
打造更高效 · 节能 · 稳定 · 耐用的压铸机 [www.shimidcm.com](http://www.shimidcm.com)

广东实密智能装备有限公司  
Guangdong Shimi Intelligent Equipment Co.,Ltd

## COMPANY PROFILE 公司简介

广东实密智能装备有限公司是一家专业从事研发、制造、销售和出口冷室、热室、立式等压铸机的生产制造企业。公司自2009年成立以来，依靠专业的研发团队，结合国内外先进的压铸机生产制造工艺，自主研发生产出数百种具有高性能、高稳定性可靠的可靠产品，时刻走在行业技术的前端，从而实现了公司的快速发展，并于2022年在广东江门投资新建生产基地，占地面积2.3万平方米。

实密，拥有生产大型压铸机的研发和制造能力，通过高精密的加工设备、行业顶尖的检测仪器、严谨的装配技术以及国际知名的压铸机元件，全面提升提升了产品的整体水平和核心竞争力，从原材料、机加工、焊接、组装、调试，到最终检验，拥有完善、科学的生产及检验体系。

每一台压铸机在出厂前的最终检验时间超过72个小时，确保每个细节做到极致，在保证机器稳定耐用的前提下打造出更高效节能的压铸机产品。

Guangdong ShiMi Intelligent Equipment Co., Ltd. is a professional manufacturing enterprise engaged in research and development, manufacturing, sales and export of cold and hot chamber die-casting machines, vertical die-casting machines and semi-solid die-casting machines. Since founded in 2009, relying on professional R&D team, combining with advanced die-casting machine manufacturing process at home and abroad, ShiMi independently researched and developed hundred types of high-performance, high-stability and reliable machines, by staying ahead in this industry, making company have a rapid development, and it has invested in a new production base in Jiangmen, Guangdong in 2022, covering an area of 23000 square meters.

ShiMi has the capabilities of R&D and manufacturing to produce Heavy Type die casting machines, through the high-precision processing equipment, top-notch testing instruments in the industry, rigorous assembly technology and international well-known components, ensuring the overall level of machines and core competitiveness. From raw materials, machining, welding, assembly, commissioning to final inspection, ShiMi has complete production and quality control system.

The final inspection time of each die casting machine is more than 72 hours before leave factory, to ensure that every detail to be the utmost, to create more efficient, energy-saving die-casting machines under precondition of stability and durability of machines.

**GLOBAL ENJOY FIVE-STAR SERVICE**  
**全球享受 · 五星服务**

### 售前服务 PRE-SALE SERVICE 1

我们免费为用户提供压铸一站式解决方案，从车间布局、产品选型、模具设计、压铸工艺到全自动周边辅助设备。

We provide customers with one-stop solution for free of charge, from workshop layout, selection of machine models, die design, die casting process, full automatic peripherals to further machining after die-casting.

### 售中服务 IN-SALES SERVICE 2

提供各种型号之压铸机销售、安装、调试及试生产服务、介绍、培训中高级压铸人才。

To recommend and provide professional talents in aspect of sales, installation, commissioning and trial-production for various models of die-casting machine .

### 售后服务 AFTER-SALE SERVICE 3

实密在国内以数十个省市为支点，建立了周全的国内销售服务网络，在海外，实密在全球多个国家拥有销售和售后服务网点，本着“及时响应，专业透明”的售后理念，赢得了海内外众多客户的广泛好评。

With dozens of provinces and cities as the fulcrum in China, we have established a comprehensive domestic sales and service network. We have sales and after-sales service outlets in many countries around the world as well. With the after-sales concept of "Timely response, professional and transparent", ShiMi has been widely praised from large numbers of customers at home and abroad.

### 研发专利 R & D PATENTS 4

## 高性能冷室压铸机系列 DC2000H

High Performance Cold Chamber Die Casting Machine Series DC2000H

### 性能

Performance

- +最大空射速度 > 8m/s
- + 增压建压时间 ≤ 15ms
- + Maximum idle shot speed > 8m/s
- + Pressure build up time ≤ 15ms

前抽杠快速换模  
Quick Die change with front draw bar

一体式双顶针缸  
One-piece double ejector cylinder

高强度的机铰设计  
High strength toggle design

- 低速段：可进行精确控制，避免空气卷入起藏气问题。
- 高速段：可迅速达至高速，有效控制填充时间及铸件成型效果。
- 增压段：可按工艺改变增压速度，加强铸件密度而不引起变形。
- Low-speed stage ; it can be accurately controlled to avoid the air involved in gas accumulation.
- High speed stage ; can quickly reach high speed, effectively control the filling time and casting molding effect.
- pressure-boosting stage : the pressurization speed ; speed can be changed according to the process to strengthen the casting density without causing deformation.

可靠的前置增压系统  
Reliable front setting pressurization system

## 冷室系列控制节能压铸机的特点、优势。

Features And Advantages Of Dc Series Cold Chamber Die Casting Machines.

### 加强型机铰设计 Reinforced toggle design

锁模单元采用五点式机铰设计专用软件，优化连杆结构提升运动特性。  
销轴钢套采用合金钢套(油润滑同时存在)减少了润滑次数及防止无油时机铰咬死。  
Mold clamping unit adopts Five-dot type toggle design, which optimized structure of connecting rod and enhanced movement ability.  
The steel bushing of toggle pin adopts alloy steel bushing (oil lubrication exist simultaneously), which reduce times of lubrication and prevent locking of toggle when no oil .

### 新一代稳定可靠压射系统 New Generation Stable and Reliable Injection System

采用17.5Mpa系统压力,最大空压射速度达到8~9.5m/s,压射力增加5~8%左右,对壁薄、致密性和表面光洁度有要求的产品更易成型,有效减少压铸件气孔率,特别适合汽车铸件及受力铸件。

Using 17.5Mpa system pressure, the maximum idle shot speed reaches to 8~9.5m/s, the injection force increases about 5~8%, it is more easier to molding to products with thin wall or high requirement on density and surface finish, to reduce porosity of die castings effectively , especially suitable for automotive castings and stress castings.

### 模板和导柱系统 Platen and Tie Bar System

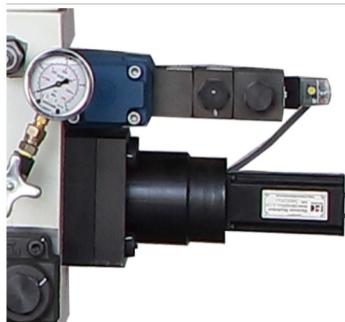

模板等主要零件经过多次优化设计,在通过有限元软件的分析基础上,再进行模板的强化设计(铸件再次加厚或支撑筋增加等),即保证模板的寿命同时也保护了模具。每种机型的拉杆均通过最专业的检测机构进行测试,保证机器在运作时,拉杆的变形量处于合理范围。

The optimal design of platens have been carried out multiple times through analysis of finite element software, then strengthening design (increased thickness and support ribs of castings ), which both guarantee the service life of platen and mold. The tie bars of each machine have passed the test by professional testing organization, to ensure the deflection of tie bars within reasonable scope during the operation of machine.

### 伺服节能系统 Servo energy saving system

采用伺服动力系统设计, 节能45~75%,系统压力流量双闭环控制, 动作反应迅速,机器运行更平稳。  
Servo power system design, energy saving 45 ~ 75% , system pressure and flow double closed-loop control, quick reaction, the machine runs more smoothly.

### 电动调节阀系统 Electric control valve system

电动调节阀压射速度控制精度更高。调节方便省力。  
The electric control valve achieves higher precision in injection speed control . Convenient and labor-saving adjustment .

### 全自动集中润滑系统 Automatic centralized lubrication system

中央自动润滑系统, 定时润滑机铰提高机械寿命及减少维修。  
Central automatic lubrication system, timing lubrication toggle to improve mechanical life and reduce maintenance.

## 立式高性能冷室压铸机系列 DL90T-DL1000T

High Performance Vertical Cold Chamber Die Casting Machine Series DL90T - DL1000T

### 性能

Performance

- +最大空压射速度> 8m/s
- +最快空循环时间<15s
- + Maximum idle shot speed > 8m/s
- + Pressure build up time ≤ 15ms

### 立式压铸机优点

- 1.相对于卧室机:合金溶液在模具充型过程中,溶液不受重力影响,模具内部气体更容易排出,产品气密度会更好;
- 2.合金溶液夹渣:受合金溶液重力影响,卧室机注射方式原因,会造成夹渣去向不稳定,立式压铸机可以避免此类问题:

### Advantages of vertical die casting machine

- 1.Relative to the horizontal machine: In the mold filling process, the alloy liquid is not affected by gravity, gas inside mold internal is more easier to discharge , the density of casting products will be better .
2. Alloy liquid slag: Under the influence of gravity of alloy liquid , due to injection mode of horizontal machine, it will cause unstable direction to slag, vertical die-casting machine can avoid this kind of problem.

## 全新一代锌合金压铸机

New Generation Zinc Alloy Die-casting Machine

1. 不锈钢锌锅:不锈钢锌锅相比普通不锈钢锌锅,抗腐蚀能力强,更经久耐用。
2. 主要电气元件:电控部分配置施耐德和欧姆龙电气元件、台达PLC、威纶显示屏。
3. 液压控制阀:液压控制主要配置德国力士乐油阀和台湾油研阀和油泵。
4. 旋转落料斗:机器半自动运行时,落料斗可旋转到机前位置(用于冷模或新模试压产品);机器自动运行时,落料斗可旋转90° 到炉底位置(自动线传输位置,全自动生产)。

1. Stainless steel Pot for zinc : strong corrosion resistance, more durable .
2. main electrical components: electronic control parts are Schneider and Omron electrical components. Delta PLC and Weinview display.
3. Hydraulic Control Valve and Oil Pump : Rexroth Germany and Yuken Japan
4. Rotating hopper : when machine under mode of semi-automatic, the hopper can be rotated to the front of the machine (for cold mold or new trial mold) ; when under mode of full automatic production , the hopper can be rotated 90° to the bottom of the furnace (automatic line of transmission position, fully automatic production).

5. 自动停泵:机器运转在一段(时间可自行设定)内无动作时,电机油泵会停止运转,减少电量和油泵损耗(如:机器试压模、修模操作人员未按急停按钮或机器长时间报警时,超过设定时间,电机油泵会自动停止工作),主要为了减少安全事故发生。
6. 自动泄压:机器出现故障急停时,系统压力自动泄压(避免机器长时间停机或故障报警急停时,机器处于高压状态,可延长油封使用寿命及减少安全事故的发生),主要为了减少安全事故发生,
7. 整机密封件:密封件选用进口油封。

- 5, Automatic Pump Stop : The machine has no action in a period of time (time can be set), the motor pump will stop running, reduce the power and oil pump loss. (such as mold trail, mold repairman did not press the emergency stop button or the machine alarm for a long time , over the set time, the motor oil pump will automatically stop working), mainly aim to reduce the occurrence of safety accidents.
- 6, Automatic pressure release : when emergency stop due to failure of machine, the system pressure automatic releasing, (to avoid machine under mode of high pressure for long time when machine stop or Emergency stop due to failure of machine, to prolong the service life of oil seals ), mainly aim to reduce the occurrence of safety accidents.
- 7, Seal elements of whole machine : seal elements are imported from abroad.

## 热室系列 DM90T-DM400T

Hot Chamber Die Casting Machine Series DM90T - DM400T

1. 采用快速差动再生锁模油路系统，开锁模动作运行平稳快速，提高生产效。
  2. 标配液压抽芯阀动型板1组。
  3. 台达和欧姆龙控制系统，威纶触控屏，方便操控，丰富的各项功能页面，满足压铸工艺的调控。
  4. 强大参数储存功能,方便以后生产调用,提高生产效率,保持产品质量一致。
  5. 机身线路采用耐油耐温且外包钢丝护网电线.即使在恶劣的环境都很好防护，保证正常生产。
1. Adopt the fast differential regeneration mold-clamping hydraulic system, the movement of mold clamping/open runs smoothly and quickly, improving the production efficiency .
2. Standard hydraulic core-pulling valve is one group to movable die platen.
3. Delta and Omron control system, Weinview touch screen, easy to operation, substantial functional pages to meet the die-casting process control.
4. Powerful parameter storage function, convenient for production calls, improve production efficiency , keep product quality consistent.
- 5.The fuselage line is oil-resistant and heat-resistant and covered with steel wire mesh, for very good protection even in the harsh environment , ensure normal production.

## 新一代锌合金压铸机/高效/高精度/高稳定性

New Generation Zinc alloy die casting machine/high efficiency/high precision/high stability

实密热室压铸机被广泛应用于卫浴、服装、箱包、运动器材、五金饰品、电工电子、儿童玩具、汽配件、家居、航空航天等众多五金制品行业中。  
ShiMi Hot Chamber Machines are widely used to sanitary ware, clothing, bags, sport equipment, hardware jewelry, Electrical and electronic, Children's toys, fishing, home appliances, aerospace and many other hardware products.

## 热室系列控制特点

Features of Hot Chamber Die Casting Machines Series

### 先导式溢流控制液压系统

Pilot overflow control hydraulic system

智能动态运转、节能率高、清除高压节流、降低油温。

Intelligent dynamic operation, high energy-saving rate, high pressure throttling, low oil temperature.

### 压射系统

Injection system

- 采用一个独立的高速储能器,有充足的储压容量,保证稳定的压射力。
- 宽幅的压射速度调整范围。
- 高速压射最大空压射速度稳定,生产高品质铸件的保证。
- 油压冲击小,重复精度高,适合生产高致密铸件。
- 气囊和活塞式储能结构,提高动作反应,改善压射系统的整体性,减少漏油点。
- An independent high-speed accumulator with sufficient pressure storage capacity ensures a stable injection force.
- Wide range of injection speed adjustment.
- High-speed injection maximum air injection speed stability, production of high-quality castings guarantee.
- Low oil pressure impact, high repeat precision, suitable for production of high-density castings.
- Air Bag and piston type energy storage structure, improve action response, improve the integrity of the injection system, reduce oil leakage points.

### 电器控制系统

Electrical control system

- 为了满足不同地区客户的需求,控制系统和触摸屏分别有不同选项供客户选择:西门子、台达或欧姆龙控制系统;西门子、台达或威纶触控屏。方便操控,丰富的各项功能页面,满足压铸工艺的调控。
- 强大参数储存功能,方便以后生产调用,提高生产效率,保持产品质量一致。
- 机身线路采用耐油耐温且外包钢丝护网电线,即使在恶劣的环境都很好防护,保证正常生产。
- 独特的旋转落料斗位置选择,可供客户根据厂房情况选择更好的落料方式。
- In order to meet the needs of customers in different regions, the control system and touch screen have different options for customers to choose: Siemens, Delta or Omron control system; Siemens, Delta or Vacon touch screen. Easy to control, a wealth of functional pages to meet the die-casting process, the regulation.
- Powerful parameter storage function, convenient for later production call, improve production efficiency, keep product quality consistent.
- The fuselage line adopts oil-resistant and heat-resistant wire wrapped with steel wire mesh, even in bad environment, it is well protected to ensure normal production.
- Unique position selection of rotary blanking Hopper, allowing customers to choose a better blanking method according to plant conditions.

### 锁模系统

Mold Clamping System

- 四条大杠导柱、采用高拉力钢为原材料、表面再经高频热处理加硬、外层再电镀硬铬、高耐磨性、延长机械使用寿命。
- 三大模板和机铰采用高强度球墨铸铁,曲肘连杆五点扩力结构,提供强大的锁模力。
- 锁模动作分多级压力和速度控制及低压锁模保护功能。
- 油缸液压顶出设计,提供平衡的顶出力,减少产品顶出变形的因素。
- 采用中央电动润滑系统,先进的逐点定量式润滑,保证远近各润滑点润滑均匀,而且有液位及压力报警功能,确保机器良好的润滑效果。
- 机器配置模具冷却水接点,方便安装操作。
- Four tie bars using high-tension steel as raw material, the surface is hardened by high-frequency heat treatment, the outer layer is re-plated with hard chromium, high abrasion resistance, and prolong the service life of the machine.
- High strength nodular cast iron is used in the three platens and toggle and the five-point expanding force structure of the connecting rod is used to provide strong clamping force.
- Multi-stage pressure and speed control and low-voltage mold-locking protection.
- Cylinder hydraulic ejector design, to provide a balanced ejection force, reduce the product ejection deformation factors.
- Central electric lubrication system, advanced point-to-point quantitative lubrication, to ensure that all points near and far lubrication uniform, and liquid level and pressure alarm function, to ensure good machine lubrication effect.
- The machine is equipped with mould cooling water contact for easy installation and operation.

### 液压系统

Hydraulic System

- 采用一个独立的高速储能器,有充足的储压容量,保证稳定的压射力。
- 压射速度可单独控制,反应灵敏、动作平稳。
- 压射动作由一段速控制,配合特定的波压系统,适用各种表面要求较高的产品工艺要求。
- 宽幅的压射速度调整范围。
- 高速压射最大空压射速度稳定,生产高品质铸件的保证。
- 油压冲击小、重复精度高,适合生产高致密铸件。
- 胶囊式储能结构,提高动作反应速度,改善压射系统的整体生产效率和产品品质要求。
- 采用快速锁模油路系统,提高生产效率。
- 使用可靠品牌液压元件(东京计器、油研等品牌)。
- An independent high-speed accumulator with sufficient pressure storage capacity ensures a stable injection force.
- The injection speed can be controlled separately, the reaction is sensitive and the action is stable.
- Injection action by a speed control, with a specific wave pressure system, suitable for a variety of surface requirements of the product process requirements.
- Wide range of injection speed adjustment.
- High-speed injection maximum air injection speed stability, production of high-quality castings guarantee.
- Low oil pressure impact, high repeat precision, suitable for the production of high-density castings.
- The capsule energy storage structure can improve the action reaction speed, improve the overall production efficiency and product quality requirements of the injection system.
- Adopt fast mode-locking oil circuit system to improve production efficiency.
- The use of reliable brand hydraulic components (Tokyo Keiki, Yuken and other brands).

Our company reserves the right to make any data changes without notice.  
Size of the machine not includes furnace and control box.

**参数表**

Technical Parameter of Peripheral Equipment

五连杆式给汤机		规格/机型		SMLB2	SMLB4	SMLB6	SMLB8	SMLBA	SMLBC
	适用压铸机 Suitable die casting machine	125~400T	500~900T	1000~1250T	1600T	2000~2250T	125~3000T		
给汤量 Pouring capacity	0.5~3.5kg	3.5~8.0kg	8~15kg	12~20kg	15~25kg	25~35kg			
给汤精度 Pouring accuracy			+2%						
循环时间 Cycle time	Max. 15sec	Max. 18sec	Max. 30sec	Max. 35sec	Max. 40sec	Max. 50sec			
坩埚内径 Diameter of crucible	Min.550mm	Min.650mm	Min.800mm	Min.850mm	Min.1000mm	Min.1100mm			
取汤深度 Filling Depth	Max.280mm	Max.420mm	Max.430mm	Max.480mm	Max.680mm	Max.680mm			
手臂电机功率 Arm motor power	750W		1.5KW		2.2KW		3.7KW		
汤勺电机功率 Ladle Cup motor power	200W		400W		750W				
主电柜电压 Main panel power	2Φ~380V 50~60Hz		DC24V						
操作电源 Operating power									
电源容量 Power capacity	1.5KVA		3.0KVA	3.75KVA	5.6KVA				
机器重量 Weight	270KG	275KG	336KG	510KG	850KG	900KG			
自动取件机		规格/机型		SMEH-1#	SMEH-2#	SMEH-3#	SMEH-4#		
	适用压铸机 Suitable die casting machine	130~160T	200~400T		500T		630T~950T		
固定模宽 Width of fixed mold	780mm		1100mm		1150mm		1450mm		
料柄直径 Biscuit diameter	50~70mm		80~110mm						
引拔力 Pulling force	≥ 65Kgf		≥ 95Kgf						
引拔方向行程 Distance of pulling direction	≥ 250Kgf		≥ 400Kgf						
手臂行程 Arm stroke	1560mm	1780mm	2160mm		2250mm				
风压源 Input air pressure	4~6.5kgf/cm²								
空气接口 Air pressure inlet	PT3/8"								
取件重量 Extracting weight	≥ 3.5kg		≥ 8kg						
马达功率 Motor power	400w		750w						
安装方式 Mounting method	落地式/悬挂式/圆周安装/Fixed mounting		建议落地式 Floor installation is recommended						
单臂伺服喷雾机		规格/机型		SMSES1	SMSES2	SMSES3	SMSES4		
	适用压铸机 Suitable die casting machine	200T 以下	280~400T	450~500T	630~1000T				
喷头宽度 Nozzle width	270+100mm	300+100mm	420+100mm	585+100mm					
喷嘴总数 Total amount of nozzle	14pcs	22pcs	30pcs	38pcs					
喷头厚度 Nozzle thickness	135mm	200mm	200mm	300~350mm					
铜管(固定模)喷雾 Copper tubes(fixed mold) spray	19pcs (Φ6)	19pcs (Φ6)	24pcs (Φ6)	24pcs (Φ6)					
铜管(活动模)喷雾 Copper tubes(moveable mold)spray	18pcs (Φ6)	19pcs (Φ6)	23pcsf(Φ6)	23pcsf(Φ6)					
铜管(中间模)喷雾 Copper tubes(midst mold) spray	19pcs (Φ6)	18pcs (Φ6)	24pcs (Φ6)	24pcs (Φ6)					
风压源 Air pressure	4~6.5kgf/cm²								
风压源接口 Air pressure inlet	PT1"	Pt1 1/2"	2-PT1 1/2"	2-PT1 1/2"					
离型剂 Release agent	2-5kgf/cm²								
离型剂接口 Release inlet	PT 1/2"								
底座行程 Stand move distance	100mm	200mm	200mm	300mm					
模块下喷嘴 Nozzle under the model	-620mm	-750mm	-840mm	-1120mm					
铜管末端 End of copper tubes	-650mm	-830mm	-900mm	-1200mm					
上升 + 下降时间 Ascend and descend time	1.2s	1.5s	1.5s	2.1s					
裸机重量 Weight	350kg	400kg	450kg	600kg					
升降电机功率 Ascend and descend power	1.0kg	1.5kg	1.5kg	2.0kg					
底座电机功率 Stand motor power	200w	200w	200w	200w					
机器外形尺寸(长宽高) Machine size(L*W*H)	1270*500*970	1240*680*1540	1235*735*1600	1500*960*1930					

 \* 备选项 我司保留权利作出任何技术数据修改而不另行通知。  
 机器外型尺寸不包括熔炉及控制电箱。

 Our company reserves the right to make any data changes without notice.  
 Size of the machine not includes furnace and control box.

**DC立式压铸机参数表(冷室)**

Technical Parameters of Vertical Cold Chamber Die Casting Machines ( DL Series )

配置项目 Item	单位 Unit	DL100T	DL238T	DL300T	DL400T	DL550T	DL700T	DL880T	DL1000T
